

U-15 Centrifugal Separator

Drive power	4 kW
Max flow rate	150 l/min
Acceleration	1.960 x g
Separation	1 – 3 µm
Sludge Capacity	12 kg

- ✓ Outstanding separation performance
- ✓ Over 25 years' experience and almost 3.000 installed machines
- ✓ New independent bearing system and new space saving design (control panel integrated)

Direct drive with independent double-bearing system

- smooth running even at high sludge loads
- easy maintenance
- space-saving design
- low noise emission (70 dB)

Fluid-dynamical accelerator hub

- real fluid acceleration
- big flow radius
- effective particle separation

Robust safety locking latch mechanism

- quick sludge insert exchange
- lifetime use

Sturdy polypropylene sludge insert

- designed for rough use
