

IGK 912

Technical data sheet

Application field	Bio-based CLP hazard pictograms free rinsing agent for sealant mixers in use with IGK 130
Characteristics	Clear amber liquid
Application temperature	+15 °C to + 30°C
Packing	20 liter jerrycan
Storage life	24 months stored in a cool, dry and clean place.
Application	The mixer is flushed for 5 to 10 minutes in a closed circuit after each working day. The cleaning agent should be left in contact over night with the sealant in order to release the PU residues. The next day, before starting the machine, the cleaning agent is pressed out of the mixer by air-pressure. Avoid using on Neoprene, Buna, Nitrile, Butyl or Viton seals.
Safety	Please take appropriate safety precautions. Please refer to the safety recommendations in our Safety Data Sheets, processing guidelines, and on the label before using the product.

The information given above is based on accurate laboratory results and experience over many years at IGK. During the application of IGK products please adhere to the relevant processing instructions. We recommend you implement your own tests in accordance with EN1279 and/or other Quality management systems in order to ensure the best overall results. Failure to follow these recommendations may cause damage for which IGK is not responsible.
